

Web application testing using Selenium Web Driver

White Box testing				
sr.no	test case	Expected output	Actual output	Remark
1	both username & password valid	login successful	login successful	pass
2	username valid password invalid	login failed invalid password	login failed invalid password	pass
3	username invalid password invalid	login failed invalid username	login failed invalid username	pass
4	both username and password in valid	login failed both username and password invalid	login failed both username and password invalid	pass
5	empty username input field	login failed enter username	login failed enter username	pass
6	empty password input field	login failed enter password	login failed enter password	pass
7	both fields empty	login failed	login failed	pass
8	space at start of username	login failed	login failed	pass
9	space at end of username	login failed	login failed	pass
10	space at start of password	login failed	login successful	fail/ invalid password still login successful
11	space at end of password	login failed	login successful	fail/ invalid password still login successful
Black Box testing				
AMAZON WEBSITE SIGN IN PAGE				
sr.no	test case	Expected output	Actual output	Remark
1	Enter email / mobile number & password	login successful	login successful	pass
2	email/mobile number invalid	sign in failed	We cannot find an account with that email address	pass
3	password invalid	sign in failed	password is incorrect	pass
4	empty username input field	login failed enter username	Enter your email or mobile phone number	pass
5	empty password input field	login failed enter password	Enter your password	pass
6	space at start of email	login failed	enter password	fail
7	space at end of email	login failed	enter password	fail
8	space at start of password	login failed	login failed	pass
9	space at end of password	login failed	login failed	pass
10	forgot password	enter otp	verify account	pass
